

NEW FROM SCAN MOBILITY

THE PAEDIATRIC HOSPITAL COT

After their success with the Impression Cot within the community for the NHS, [Scan Mobility](#) are pleased to introduce the [PAEDIATRIC COT](#) for Hospital wards. Designed in conjunction with some of the leading UK and EU paediatric specialists. The [Paediatric Cot](#) has been designed to improve the environment for patients, nursing staff, carers and parents alike. The durability and functionality of the Cot is second to none. [Scan Mobility](#) has been a major leader with new innovation products in the community for over 20 years and now we wish to pass on our traditions, strength and quality into the acute sector.

The [Paediatric Cot](#) has all the usual requirements for this type of product within the Hospital environment. Plus the head and foot board are in Plexiglas for better vision and may be opened or removed with ease, the frame work can be done in a choice of colours. For more information please contact our sale team on +441704 233344 or e mail sales@scanmobility.co.uk
