

# SERENITY 2 BARIATRIC

WHICH HAS ALL THE SAME FEATURES AS THE SERENITY 2  
WITH A WEIGHT RANGE FROM 35-50ST/222-318KG

**The Serenity 2 Bariatric** is a dynamic replacement mattress system available from Scan Mobility. It combines low pressure with alternating pressure therapy to help provide a clinical cost effective solution.

It has all the same features as the Serenity 2, with a weight range from 35-50 St/222-318Kg.

The modern digital control unit is designed to provide ease of use for any caregiver. The control unit is user friendly and easy to operate and is equipped with low pressure and mains fail audible and visual alarms. The unit compensates for patient weight distribution and position therefore optimizing the pressure relieving performance.

The mattress cover is made from a versatile fabric, which is multi stretch and breathable. This helps to contribute to the reduction of pressure sore development by helping to prevent a build up of body moisture, whilst remaining fluid proof, thus reducing heat build up. The cover offers improved durability and has 10,000-ppm chlorine resistance as well as conforming to BS7175 crib 5.

The Mattress is made up of 14 individual cells, at 15cm depth + a 5cm foam insert. The Base has a none slip bottom.

OEKI-TEX 100 compliant

## Control Unit Serenity 2 Bariatric
