

# NEW FROM SCAN MOBILITY

## THE JUNIOR HOSPITAL BED

After their success with the Alpha Junior bed within the community for the NHS, [Scan Mobility](#) are pleased to introduce the **JUNIOR PAEDIATRIC** Bed for Hospital wards. Designed in conjunction with some of the leading UK and EU paediatric specialists. The **Junior Paediatric** Bed has been designed to improve the environment for patients, nursing staff, carers and parents alike. The durability and functionality of the bed is second to none. [Scan Mobility](#) has been a major leader with new innovation products in the community for over 20 years and now we wish to pass on our traditions, strength and quality into the acute sector.

The Junior **Paediatric Bed** has all the usual requirements for this type of bed within the Hospital environment. Plus the head and footboard is in a Compact Laminate, which comes in a choice of colours as well as the bed frame.

For more information please contact our sale team on +441704 233344 or e- mail [sales@scanmobility.co.uk](mailto:sales@scanmobility.co.uk)
